

## International Conference on Sustainability in Energy and Buildings

### Invited Sessions

#### Title of Session: Intelligent Energy System

#### Name of Chair:

Dr Dong Hwa Kim,  
Department of Instrumentation and Control,  
Hanbat National University, South Korea

#### Description:

Modern research in advanced areas such as process control, instrumentation, sensors, measurements and intelligent systems including neural, fuzzy and genetic techniques, can make a considerable contribution to increased energy efficiency and reduced carbon emissions.

This invited session will provide an opportunity for researchers in the following areas to present papers on the application of intelligent techniques to energy systems.

Papers will be welcome on the following topics and other related areas:-

- Energy system modelling
- Intelligent energy control
- Intelligent renewable energy
- Intelligent energy management
- Traditional energy saving technology
- Intelligent energy saving technology
- Fusion technology for energy system
- Building system and energy
- Others by Intelligent technology
